First Pitch Pack

Five pitch templates Cimey uses to start conversations with brands, and how to make each one sound like you.

By Juliani (Cimey), UGC creator · Pekanbaru, Indonesia · cimey-ugc.vercel.app/course

How to use this pack

Five minutes of personalizing beats a perfect template.

Brands get dozens of copy-pasted messages a week. A pitch gets a reply when it shows you looked at their product and offers a specific idea. Every template below has gaps in [square brackets]. Fill each one with something only you could write after opening the brand's page.

Before you send, spend 5 minutes on this

- Open the brand's Instagram or TikTok and watch their last 5 posts.
- Find one product and write one sentence about who it is for.
- Check the Meta Ad Library: if they run ads, they are already paying for video.
- Pick the right person: marketing manager, founder of a small brand, or the "collabs" email in the bio.
- Link one video from your portfolio that is closest to their product.

> Send 3 to 5 pitches a day instead of 30 in one afternoon. Replies come from careful messages, and you have time to follow up on each.

What each template is for

#	TEMPLATE	USE IT WHEN
1	Instagram DM opener	Small brands that answer DMs
2	Email with 3 hook ideas	Brands with a marketing contact
3	Follow-up after 4 days	No reply to template 1 or 2
4	Reply to "What's your rate?"	A brand shows interest
5	App or AI tool pitch	SaaS, apps and AI brands

1 Instagram DM opener

Short, specific, one question at the end. Keep it under 70 words.

Hi [Name]! I watched your [product] reel and loved [one specific detail, e.g. the moment you show the texture].

I'm Cimey, a UGC creator who makes [skincare / app / travel] videos in English and Bahasa Indonesia. Here is one I made for [similar brand]: [link]

I have an idea for a 20 second video showing [specific idea]. Would you like me to send the 3 hooks I'd test?

Why it works

- The first line proves you watched their content.
- One portfolio link, chosen for them.
- The question is easy to answer with yes.

> Do not attach your whole portfolio or a price in the first message. Get the reply first.

Your version

2 Email with 3 hook ideas

The hooks are the pitch. Give 3 and brands see your thinking.

Subject: 3 hook ideas for [product name]

Hi [Name],

I'm Cimey, a UGC creator from Indonesia. I make vertical videos for [category] brands, including [brand 1] and [brand 2]. Portfolio: [link]

After looking at [product], here are 3 hooks I would film:

1. "[Hook 1, e.g. I tried every [product type] under $20 so you don't have to]"
2. "[Hook 2, e.g. POV: your skin after 7 days with [product]]"
3. "[Hook 3, e.g. What I wish I knew before buying [product type]]"

I film on a phone with natural light and deliver 9:16 files with captions, ready for TikTok and Meta ads. If one of these fits your next campaign, I can send a short plan for it.

Thanks for reading,
Cimey

> Subject lines with the product name get opened more often than "Collaboration inquiry".

Your version

3 Follow-up after 4 days

Most replies come after the second message. Send it once, then one more a week later.

Hi [Name], I'm following up on my message about [product]. I put together a quick idea in case it helps: [one line, e.g. a 15 second "get ready with me" using your new serum].

If it's not the right time, no problem at all. Could I check back in a month?

Rules for follow-ups

- Add something new: a fresh idea, a new portfolio video, or a link to their latest post.
- Keep it shorter than the first message.
- Stop after 2 follow-ups and note a date to try again in 30 days.

Your version

4 Reply to "What's your rate?"

The moment a brand asks, you are in a real conversation. Answer with a package and a question.

Thanks for asking, [Name]! My price depends on the number of videos and how you plan to use them.

For one 20 to 40 second video I charge $[price]. That includes a script, filming, editing, captions, and one round of revisions. Usage rights for organic posting are included, and paid ads use are $[price] for 30 days.

Could you tell me which platform it's for and when you need it? I'll send exact numbers the same day.

Things to charge for separately

ADD-ON	WHY
Paid ads usage (30 / 90 days)	The brand earns from the video
Raw footage	Gives them more editing options
Extra hooks	Quick to produce, valuable to test
Rush delivery	Protects your schedule
Extra revisions	One round is included

> Do not apologize for your price and do not explain your hours. State the number, list what is included, and ask your question.

Your rate card

ITEM	YOUR PRICE
1 video	$
3 video pack	$
Ads usage 30 days	$
Raw footage	$

5 App or AI tool pitch

App and AI brands buy screen demos and honest first impressions. Show you can explain the product fast.

Hi [Name],

I'm Cimey, a UGC creator who makes screen demo and talking head videos for apps and AI tools, including [example brand]. Here is a recent one: [link]

I tried [product] this week and the part that stood out was [specific feature, e.g. how fast it turns a voice note into a summary]. I would build a 25 second video around that:

Hook: "[e.g. I stopped typing my notes, here is what I do instead]"
Show: screen recording of [feature] in real use
Close: one clear call to action to your trial or download link

If you want, I can send a one page plan, and you can decide if it fits your next ad round.

What app brands look for

- The first 3 seconds explain the problem.
- The screen recording is clean and readable on a phone.
- The voice sounds natural, in the language of the audience.
- You can deliver several hook variations of the same video.

> Bilingual creators have an edge here. Mention that you can deliver the same video in English and Bahasa Indonesia.
