Five minutes of personalizing beats a perfect template.

Brands get dozens of copy-pasted messages a week. A pitch gets a reply when it shows you looked at their product and offers a specific idea. Fill every [square bracket] with something only you could write after opening the brand's page.

BEFORE YOU SEND: 5 MINUTES

1. **Watch their last 5 posts**
   Open the brand's Instagram or TikTok.
2. **Pick one product**
   Write one sentence about who it is for.
3. **Check the Meta Ad Library**
   If they run ads, they already pay for video.
4. **Find the right person**
   Marketing manager, small-brand founder, or the "collabs" email in the bio.
5. **Link one portfolio video**
   The one closest to their product.

Subject: 3 hook ideas for [product name]

Hi [Name],

I'm Cimey, a UGC creator from Indonesia. I make vertical videos for [category] brands, including [brand 1] and [brand 2]. Portfolio: [link]

After looking at [product], here are 3 hooks I would film:

1. "[Hook 1, e.g. I tried every [product type] under $20 so you don't have to]"
2. "[Hook 2, e.g. POV: your skin after 7 days with [product]]"
3. "[Hook 3, e.g. What I wish I knew before buying [product type]]"

I film on a phone with natural light and deliver 9:16 files with captions, ready for TikTok and Meta ads. If one of these fits your next campaign, I can send a short plan for it.

Thanks for reading,
Cimey

Subject lines with the product name get opened more often than "Collaboration inquiry".

Hi [Name], I'm following up on my message about [product]. I put together a quick idea in case it helps: [one line, e.g. a 15 second "get ready with me" using your new serum].

If it's not the right time, no problem at all. Could I check back in a month?

Could you tell me which platform it's for and when you need it? I'll send exact numbers the same day.

5 App or AI tool pitch

App and AI brands buy screen demos and honest first impressions. Show you can explain the product fast.

New message

Hi [Name],

I'm Cimey, a UGC creator who makes screen demo and talking head videos for apps and AI tools, including [example brand]. Here is a recent one: [link]

I tried [product] this week and the part that stood out was [specific feature, e.g. how fast it turns a voice note into a summary]. I would build a 25 second video around that:

Hook	→	Show	→	Close
"[e.g. I stopped typing my notes, here is what I do instead]"		Screen recording of [feature] in real use		One clear call to action to your trial or download link

If you want, I can send a one page plan, and you can decide if it fits your next ad round.

WHAT APP BRANDS LOOK FOR

- ✓ The first 3 seconds explain the problem.
- ✓ The screen recording is clean and readable on a phone.
- ✓ The voice sounds natural, in the audience's language.
- ✓ You can deliver several hook variations of one video.

Bilingual creators have an edge here. Mention that you can deliver the same video in English and Bahasa Indonesia.
